

Training Load	Interrogation Load	Maximum Error	RMS Error
Step	Step	15.12%	3.39%
Step	Step with 5% distortion	14.29%	6.06%
Step	Step with 10% distortion	14.15%	5.11%
Step	Step with 25% distortion	14.42%	5.05%

The distortion has marginal effect on the maximum and RMS errors

>Amplitude is increased while time period is decreased or vice versa—power dissipation remains constant
